TITLE	Community District Profiles for 1969-70 School Year by Newly Aligned Community School Districts.
INSTITUTION	New York City Board of Education, Brooklyn. Div. of Systems Planning and Program Analysis.
PUB DATE	Sep 70
NOTE	203p.
EDRS PRICE	EDRS Price MF-$1.00 HC-$10.25
DESCRIPTORS	*Academic Achievement, Achievement Rating, Budgeting, *Budgets, Educational Facilities, Educational Planning, Elementary Schools, Junior High Schools, Population Distribution, Population Trends, School Districts, *School Planning, *Tax Allocation
IDENTIFIERS	New York City

ABSTRACT

This report presents a statistical overview of each of the 31 newly aligned Community School Districts of New York City. It contains the 1969-70 tax levy condition of each district in terms of school plant facilities, pupil population, school personnel, and per-pupil budgeted costs. The information provided is considered to be, hopefully, helpful to school boards and superintendents. In each category of analysis, city-wide figures for each set of statistics are listed alongside the district figures for the purpose of comparison. Data are displayed for both elementary and junior high schools. The tabular displays follwing each district profile present a more detailed look at some of the variables which have been linked to pupil achievement. Each of these variables is shown in school-by-school terms and ranked from lowest to highest within the district. The data displayed reflect the 1969-70 school year. Although newly aligned Community School Districts did not come into being until July 1, 1969, the data have been aggregated school-by-school into the new district terms. (JW)

TO: COMMUNITY SCHOOL BOARD CHAIRMEN AND
COMMUNITY DISTRICT SUPERINTENDENTS

Ladies and Gentlemen:

Enclosed you will find a copy of Community District Profiles for The 1969-1970 School Year. The information displayed reflects 1969-1970 data which has been recast into the new district alignments. Profiles have been prepared for the 31 community districts. Sources of information have been cited and specific preparation dates of the reports used are indicated. All positions and dollars included represent tax levy funds only.

The attached sheets in the form of questions and answers are intended to provide some explanation of apparent anomalies contained in the profiles.

I hope that this compilation of district data will serve the district as a useful reference guide. Your suggestions as to how future profiles can better meet your particular needs would be most welcome.

Very truly yours,

Harvey B. Scribner
HARVEY B. SCRIBNER
Chancellor

EXPLANATORY SHEET - COMMUNITY DISTRICT PROFILES

1. Q. Why were 1969-1970 data used instead of 1970-1971 information?

   A. Data included represent different reporting dates throughout the school year. For example, Metropolitan Achievement Tests will not be administered for the 1970-1971 year until early in 1971. Thus, in order to provide as complete a profile as possible, the 1969-1970 school year data was used.

2. Q. Why are the per capita figures cited in this publication (September 1970) different from those district per capitas indicated in An Analysis of City Funded Per Capita Budgeted Costs and Staff Ratios, August 1970?

   A. Per capita figures indicated in the Community District Profiles of September 1970, include Special Education (CRMD, Blind, Health Conservation etc.). Those figures cited in the Analysis of City Funded Per Capita Budgeted Costs of August 1970 do not include Special Education positions, dollars and enrollment.

3. Q. Why are there significant variations in per pupil budgeted cost even within the same district?

   A. Average teacher salary rates differ from school to school. Thus schools with high average teacher salary rates would show per capita costs above the district average. Lower average salary rates would result in per capita costs below the district average.

   Additional staff position allowances have been allotted to schools with special programs thus generating higher per capita costs. Examples of such special programs are All Day Neighborhood Schools, Enriched Elementary Program, Pilot Intermediate Schools, etc.

   Schools with large numbers of disadvantaged children have been the recipients of more liberal staff allowances as reflected by class size and staff ratio factors. This would result in higher per capita costs.

   The historical pattern of position allocation to a school may have been to allot a more generous number of staff positions because of an immediate existing need or special educational project. Since allotments were made on an incremental basis, (anticipated register increase or decrease), this additional allocation often remained in the school even though in some cases the need may have lessened or the special project dropped.

   The special formula used for allocation of positions for the 1970-1971 school year was designed to reduce inequities in position allocation which may have existed in previous years.

4. Q. Why are there sizeable variations in the percentage of experienced teachers within the same district and from district to district?

   A. The rate of teacher turnover is higher in schools in disadvantaged areas. The provisions of the Transfer Plan contained in the present contract with the UFT have been designed to reduce this turnover.

5. Q. Why are there wide variations in building utilization?

   A. School enrollment is not evenly distributed among or within school districts.

   Within a school district the pupil population characteristics may vary. For example, a part of a district may have a significant percentage of its school age children attending non-public schools.

COMMUNITY DISTRICT PROFILES FOR THE 1969-1970 SCHOOL YEAR

BY

NEWLY ALIGNED COMMUNITY SCHOOL DISTRICTS

INTRODUCTION

This report presents a statistical overview of each of the thirty-one newly aligned Community School Districts. It contains the 1969-70 tax levy condition of each district in terms of school plant facilities, pupil population, school personnel and per-pupil budgeted costs.

It is hoped that this report will be helpful to Community Superintendents and Community School Boards in providing useful information concerning their districts.

THE DATA

A series of displays present a profile of each Community District in terms of the following categories:

School Plant
Pupils
Staff
Per-Pupil Budgeted Costs

City-wide figures for each set of statistics are listed alongside the district figures for the purpose of comparison. Data is displayed for both Day Elementary and Junior High Schools.

The tabular displays following each district profile present a more detailed look at some of the variables which have been linked to pupil achievement. Each of these variables is shown in school-by-school terms and ranked from lowest to highest within the district.

The data displayed reflects the 1969-70 school year. Although newly aligned Community School Districts did not come into being until July 1, 1970, the data has been aggregated school-by-school into the new district terms.

I - SCHOOL PLANT

School Plant data for each district includes:

Number of Schools

Those schools officially designated in October , 1969 as Title I and Non Title I schools

Utilization of School Buildings

The percent utilization of all school buildings (special circumstances, such as the housing of a school in a private dwelling or in a junior high school building, prevented the inclusion of seven elementary school buildings in the utilization figures)

II -PUPILS

Pupil population data for each district indicates:

Enrollment

The number of pupils on register in Title I and Non Title I schools

Ethnic Composition

The percent of Black, Oriental, Puerto Rican, Other Spanish Surname and Other children in each district

Percent of Children with Severe English Language Difficulty

Percent of Children Eligible for Free Lunch

Average MAT Reading Score

The 1969-70 results of the Metropolitan Achievement Test in reading; 4th grade scores in elementary schools, 8th grade scores in junior high schools

III -STAFF

Number of Positions

The total number of positions in the district according to the following categories:

Activity Direction - Heads of School, A.P's and Chairmen
Instructional Personal Service - Teaching Staff
Pupil Personnel Services - Guidance Counselors
Non-Instructional Personal Service - School Secretaries and Laboratory Assistants (for Junior High Schools)

Average Salaries

Average salaries computed for each of the preceding four categories

Percent of Teachers with More Than Three Years Experience

The proportion of tenured teachers within the district

Pupil-Teacher Ratio

The ratio of pupils to all teachers in the district - classroom, cluster, reading, library, etc.

Average Class Size

The ratio of pupils to classroom teachers only - grade teachers, special guidance, junior guidance, and special education (CRMD, Blind, Health Conservation, etc.) teachers

IV - PER-PUPIL BUDGETED COST (TAX-LEVY)

Personal Service

Total salaries of staff in Section III divided by the enrollment

Other Than Personal Service

Total cost of equipment, supplies, library and textbooks divided by the enrollment

Total

Combined Personal Service and Other Than Personal Service costs divided by enrollment

SOURCE OF MATERIAL

The data on utilization of school buildings comes from the 1969-70 publication of the School Planning and Research Division entitled "Utilization of School Buildings". Data on pupil enrollment, ethnic composition, English language difficulty and Free Lunch eligibility was obtained from the Bureau of Educational Program Research and Statistics. Metropolitan Achievement Test reading scores were provided by the Bureau of Educational Research.

The March 1, 1970 school staff and budgeted cost data was obtained from a school-by-school report sent in by each of the former district offices. It was then realigned into new district terms.

Average salaries are from actual 1969-70 payroll records.

The pupil-teacher ratio, average class size and per-pupil budgeted cost figures were computed by the Office of Planning-Programming-Budgeting.
